- Works great to restore body lines
- Works with all UNI-SPOTTER Stud Welders
- Quick and easy to use
- Lightweight and portable for out-of-position pulls

The perfect partner
for the 1080 Uni-Clamp.

1045 Eliminator

Upgrade any **UNI-SPOTTER Stud Welder** by adding a 1045 Eliminator Adapter with **STUD EASE Technology!** Works with all existing welding studs.

- Allows studs to be welded side-by-side by bending the stud sideways while welding the next studs.
- Studs can actually be fused together to form a pulling block.

UNI-SPOTTER Welding Studs

1001 Flexpert

2.2 mm, for regular sheet metal damage. 500 lbs. fusion strength with 1500 lbs. tensile strength.

1002 Heavyweight 2.6 mm, the heaviest stud available. 500 lbs. fusion strength with 2000 lbs. tensile strength.

1080 Uni-Clamp

- Can be used to pull a dent progressively leaving a flatter surface.
- Works with 2 to 11 studs, depending upon dent size.
- Includes screw wrench to tighten screws.
- Comes with a clevis for attaching to body frame equipment, or a come-along.

Other UNI-SPOTTER Accessories Available:

- 1095 Mini Pull'r
- 1005 Molding Rivet Welding Tip
- 1007 Shrink Tip

Studs can be pulled from the center to the outside (as shown above) or from the outside to the center. Studs can be tightened and released as required to achieve a flat surface when the pull is completed.
